📋 SUMMARY

Aspiring Software Engineer passionate about problem-solving, continuous learning, and developing efficient, user-friendly solutions. Seeking opportunities to apply technical skills and contribute to impactful projects.

📜 CERTIFICATES

🌐 **Cisco Networking Academy**
Introduction to Networks | Switching, Routing & Wireless Essentials | Enterprise Networking, Security & Authentication

💻 **Infosys Springboard**
Java , DBMS 1&2 , Python, NoSQL Databases , Software Engineering and Agile Software Development

📘 **NPTEL**
Ethical Engineering Practices & Soft Skills

🌐 LANGUAGES

Tamil(R,W,S)
English(R,W,S)

🎓 EDUCATION

B.E in Electronics And Communication Engineering
Sri Krishna College of Engineering and Technology (2023–2027)
CGPA: 8.0 (Upto 6th Semester)
Coimbatore

Higher Sec Education
Govt.Girls.Hr.Sec. School (2022–2023)
Percentage: 83%

🏢 INTERNSHIP EXPERIENCE

Southern Railway Signaling Internship | June 2025 (14 days)

Acquired knowledge of railway communication and monitoring systems, including real-time operations and communication networks that support safe and efficient transportation infrastructure. Gained hands-on exposure to system monitoring and network management concepts.

📁 PROJECTS

Language Learning Application | React.js, Firebase, Firestore

- Engineered a full-stack language learning platform supporting multilingual content across six languages.
- Integrated Google Authentication and Firebase Firestore for secure user management and real-time data synchronization.
- Developed interactive learning modules, flashcards, and assessment quizzes to enhance user engagement and retention.
- Implemented progress tracking and performance analytics to deliver a personalized learning experience.

Fitness Tracker Application | React.js, Firebase, Firestore

- Developed a responsive fitness tracking application for monitoring daily activities and goal achievement.
- Leveraged Firebase Firestore for real-time activity logging and cloud-based data management.
- Implemented progress visualization, weekly performance analytics, and goal-tracking dashboards.
- Designed a scalable and user-centric interface ensuring seamless navigation across multiple modules.

Driver Drowsiness and Safety Detection System

- Designed an intelligent monitoring system to identify driver fatigue and enhance road safety.
- Implemented real-time sensor data processing and alert-generation mechanisms for risk detection.
- Developed automated notification logic to improve response time and accident prevention.
- Focused on reliability, real-time decision making, and safety-oriented system performance.

🛠 TECHNICAL SKILLS

Programming Languages :

Java , C++ , C , Python (Basic) , SQL

Web Technologies :

HTML , CSS , JavaScript , React.js , Node.js

Databases :

MySQL , Firebase & Firestore

Tools & Platforms :

Git, GitHub, Visual Studio Code, Cisco Packet Tracer, MATLAB (Basic)

Core Concepts :

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, Computer Networks, Problem Solving

Areas of Interest :

Software Development, Web Development, Data Analysis using Python
